Skyline Solar

Careers for Physicists

Dai Dee Pun obtained her PhD in Experimental Nuclear Physics from the University of Wisconsin in 1987. Since then, she has worked in a variety of companies, from startup to the world's largest semiconductor equipment company, Applied Materials. She is now the Director of Quality and Reliability at Skyline Solar, a startup company in the Silicon Valley working on enabling affordable utility scale solar energy using concentrated photovoltaic technology. She will tell us about her career as a physicist in the high tech industry in the Silicon Valley, in startups, small, and large corporations, and you will have ample opportunity to ask her questions.
