Potential Physics & Related Majors

Find Our People Meeting

You are invited to our annual “Find Our People Meeting” in which undergraduate majors and potential majors are invited to come meet, listen to, chat with, and query the people involved in the department’s undergrad program and activities. Copies of the 2008 edition of the “Physics Majors Handbook” will be distributed and potential majors, names and e-mail addresses will be solicited for the distribution lists maintained in the department office and by the Physics Club.

People whom we hope to have present for the students to meet include officers of the Physics Club and other upper division majors with information to share, the club advisor, the mentor assignment committee, the undergrad advisors, including the AMEP and honors advisor, the instructors of the undergraduate courses, the undergraduate secretary, the personnel officer, the academic department manager, the undergraduate coordinator, the chair and associate chair, and others actively involved with undergraduates, particularly those who tend to employ them or like to answer the question, “Why should I seriously consider being a Physics Major?”

Coffee, tea, cookies will be served starting at 3:30

2241 Chamberlin Hall • October 1, 2008 • 4:00 P.M.
