

Physics Department Seminar

## Meeting the Challenges!

### Opportunities for Research at Oak Ridge National Laboratory

#### Dr. Ian S. Anderson

Director, Graduate Education and University Partnerships  
Oak Ridge National Laboratory  
andersonian@ornl.gov

Oak Ridge National Laboratory carries out research in an array of scientific disciplines and technologies that support the US Department of Energy's missions in energy, the environment, and national security. ORNL's partnerships with universities are critical to carrying out its research programs; faculty and students collaborate with ORNL scientists to find innovative solutions to important scientific challenges and in doing so have access to the unique capabilities and facilities that ORNL has to offer.

The presentation will give an overview of key areas of research that ORNL is carrying out and provide information on opportunities for faculty and students to collaborate.

**Pizza & Soda will be Served**

**Tuesday, July 14, 2015**

12:00 - 1:00 pm | 5310 Chamberlin Hall
