

Dan McCammon

Physics Department, University of Wisconsin; 1150 University Ave., Madison, WI 53706 USA
608/262-5916; mcammon@physics.wisc.edu; <http://wisp.physics.wisc.edu/xray>

EDUCATION B.A. Physics, California Institute of Technology, 1966
 Ph.D. Physics, University of Wisconsin, 1971

EMPLOYMENT

1980- Assistant—Associate—Full Professor, Department of Physics, University of Wisconsin
1976-80 Assistant—Associate Scientist, X-ray Astronomy Group, University of Wisconsin
1974-76 Foreign Specialist in Physics, Prince of Songkhla University, Songkhla, Thailand
1971-74 Research Associate, X-ray Astronomy Group, University of Wisconsin

RESEARCH ACTIVITIES

General:

Studies of the soft X-ray diffuse background: particularly in the 0.05 - 1 keV range, with the goal of better understanding the interstellar and intergalactic media.

X-ray detector development: including low-background proportional counters and cryogenic microcalorimeters with 2-10 eV FWHM resolution in the 0.1 - 10 keV energy range (in collaboration with the X-ray group at the Goddard Space Flight Center).

Space Missions:

Wisconsin Diffuse Sky Survey: helped develop proportional counter detectors and filters used to produce all-sky maps in seven energy bands in the 0.1 - 6 keV energy range on a series of ten sounding rocket flights. Assisted in all flight and analysis activities.

Apollo S-150 survey: Assisted in the development and calibration of detectors and star sensors.

OSO VIII soft X-ray experiment: Assisted in development of coaxial anode detectors for background suppression and in data analysis.

ROSAT Diffuse Sky Survey: Led effort to produce *ROSAT* all-sky diffuse background maps in collaboration with Max Planck Institute for Extraterrestrial Physics (U.S. PI).

Diffuse X-ray Spectrometer: Designed and built large area Bragg crystal spectrometer for attached Shuttle mission. Obtained first high-resolution spectrum of $\frac{1}{4}$ -keV diffuse background.

X-ray Quantum Calorimeter: PI on sounding rocket experiment to obtain high resolution spectra of the diffuse X-ray background. Worked on developing detectors and led effort to design and construct cryogenic payload.

Astro-E/E2 XRS instrument: Worked on X-ray microcalorimeter detector development and testing. Supervised construction of adiabatic demagnetization refrigerator salt pill and internal calibration sources at Wisconsin.

Astro-H SXS instrument: Providing IR/vis/UV blockin filter supports and internal calibration source.

Current:

Reflight of XQC experiment with improved detectors to study diffuse X-ray background. Continued development of high resolution microcalorimeters. Construction and flight of new rocket instrument for 100-500 eV diffuse X-ray spectroscopy. Development of IR blocking filters with good EUV transmission. Laboratory measurements of partial cross sections for X-ray line production by charge exchange with heavy ions. Analysis of Suzaku, rocket, and other observations for understanding soft X-ray background. Assisting with sounding rocket cryogenics and blocking filters for Micro-Cal transition-edge sensor experiment, with applications of microcalorimeter detectors to direct measurements of neutrino mass at the University of Milano, and to measurements of the Lamb shift in hydrogenic Uranium at GSI in Darmstadt.

PROFESSIONAL SERVICE

NASA Sounding Rocket Working Group, ASTRO-D International Advisor Committee, NAS Task Group on Space Astronomy and Astrophysics, NASA Structure and Evolution of the Universe Technology Working Group, NASA Astrophysics Working Group, AAS High Energy Astrophysics Division Executive Committee, High Energy from Space Panel of NAS 2000 Decadal Survey, NASA Structure and Evolution of the Universe Subcommittee, Host and co-chair for the 9th International Workshop on Low Temperature Detectors, NRC Ad Hoc Committee on the review of the NASA Science Mission Directorate Science Plan. Astro2010 Decadal Survey committee. Chair, Astrophysics Division of American Physical Society. NASA Senior Review. NASA Explorer proposal evaluation.

AWARDS:

American Physical Society Fellow, Romnes Faculty Fellowship, Vilas Associate, NASA Exceptional Public Achievement Medal.
